# The future starts here

Change. There's been a lot of it around recently. But sometimes, change is a good thing – it's an opportunity to be different. Not just-for-the-sake-of-it different, but let's-do-things-better different.

The Future Works is an incredible new workspace campus. Tech-smart and designed with sustainability, connectivity, wellbeing and creative collaboration in mind.

So, is now the time for different? Let's find out.

Think different, work different.

# Our greatest ability is sustainability

Sustainability is key to The Future Works. The three buildings will work together as one forward-looking campus – making a difference to the health and wellbeing of everyone who works and visits, and to the environment.

We all need to do our bit. And we've done a very big bit. Photovoltaic panels, rainwater harvesting, high efficiency LED lighting, smart metering, ventilation heat recovery, electric car-charging points... Dynamic, progressive, visionary; everything you want, and a few things you didn't even know you needed.

# The greenest buildings in Slough – *literally*

The Future Works is aiming high with its green credentials. Already certified BREEAM Excellent, now we're targeting EPC A, NABERS 5\* and net zero carbon.

TARGET TO REDUCE EMBODIED CARBON AND ACHIEVE NET ZERO

TARGET FOR OPERATIONAL CARBON NOT TO EXCEED 115 KWH/M² PER ANNUM NIA

BREEAM CERTIFIED EXCELLENT (No.2): TARGETING BREEAM CERTIFIED OUTSTANDING (No.1 AND No.3)

TARGET TO ACHIEVE EPC A

LOW USE WATER FITTINGS

HIGH-PERFORMANCE FACADE AND SOLAR CONTROL

INTEGRATED ELECTRIC CAR-CHARGING POINTS

PHOTOVOLTAIC RENEWABLE ENERGY

RAINWATER HARVESTING

AIMING TO FACILITATE A NET ZERO CARBON FUTURE

ENHANCED BIODIVERSITY WITHIN A BIOPHILIC PUBLIC REALM AND MULTIPLE ROOF TERRACES

TARGET TO ACHIEVE NABERS 5\* RATING

HIGH-EFFICIENCY LED LIGHTING

# People-driven technology

The Future Works is man and machine  
(all 360,000 sq ft of it) working in harmony.

At every touchpoint we're using digital  
technology to create a future-ready  
workplace. Not tech for tech's sake, but  
smart technology that makes the whole  
working day easier, more productive and  
a lot more pleasurable.

# Healthy building = happy people

The Future Works has been designed to make you fall in love with Monday mornings. Space to think, inspiring views, a healthy environment to work in and, as if that wasn't enough, the current building (No.2 The Future Works) already has:

Rooftop gardens, landscaped walkways and green terraces with views to nearby Windsor Castle. An incredible all-day café, smart vending machines and touch-free water fountains. Daily rooftop yoga and fitness classes. Lots of bike spaces, a repair station, showers, lockers and changing rooms. Breakout spaces, chill-out zones and the UK's first AirScore Platinum accreditation. It's work, but not the way it used to be.

No.2 THE  
FUTURE  
WORKS  
WELLBEING  
SCHEDULE:

# Going to work never tasted so good

Peckish? Good, because the best little café in town just happens to be right where you work. We're talking breakfast pots; bruschetta; seared tuna; kimchi; club sarnies; cakes, hot from the oven... So what will it be? A robot-filled meal deal, or fresh food made with love, from Lucy's Kitchen? Decisions, decisions.

*Lucy's Kitchen is open now in No.2 The Futureworks.*

# All work and no play? *No thanks*

The Future Works isn't just an office space; it's part of the community.

The public space around the buildings is huge. When the future phases are built and the new campus is in full swing, there'll be four gardens, retail units (we're thinking bistro, coffee shop, florists and maybe a juice bar) and private nooks for catching the sun or reading a book.

There'll be artisan food trucks, pop-ups, and personal training sessions to burn the calories off again. And the big showstopper will be live music and summer movie nights on the bleachers of our super-cool, 100-seat outdoor auditorium. Back To The Future, anyone?

Think different, work different.

Wellness

Campus

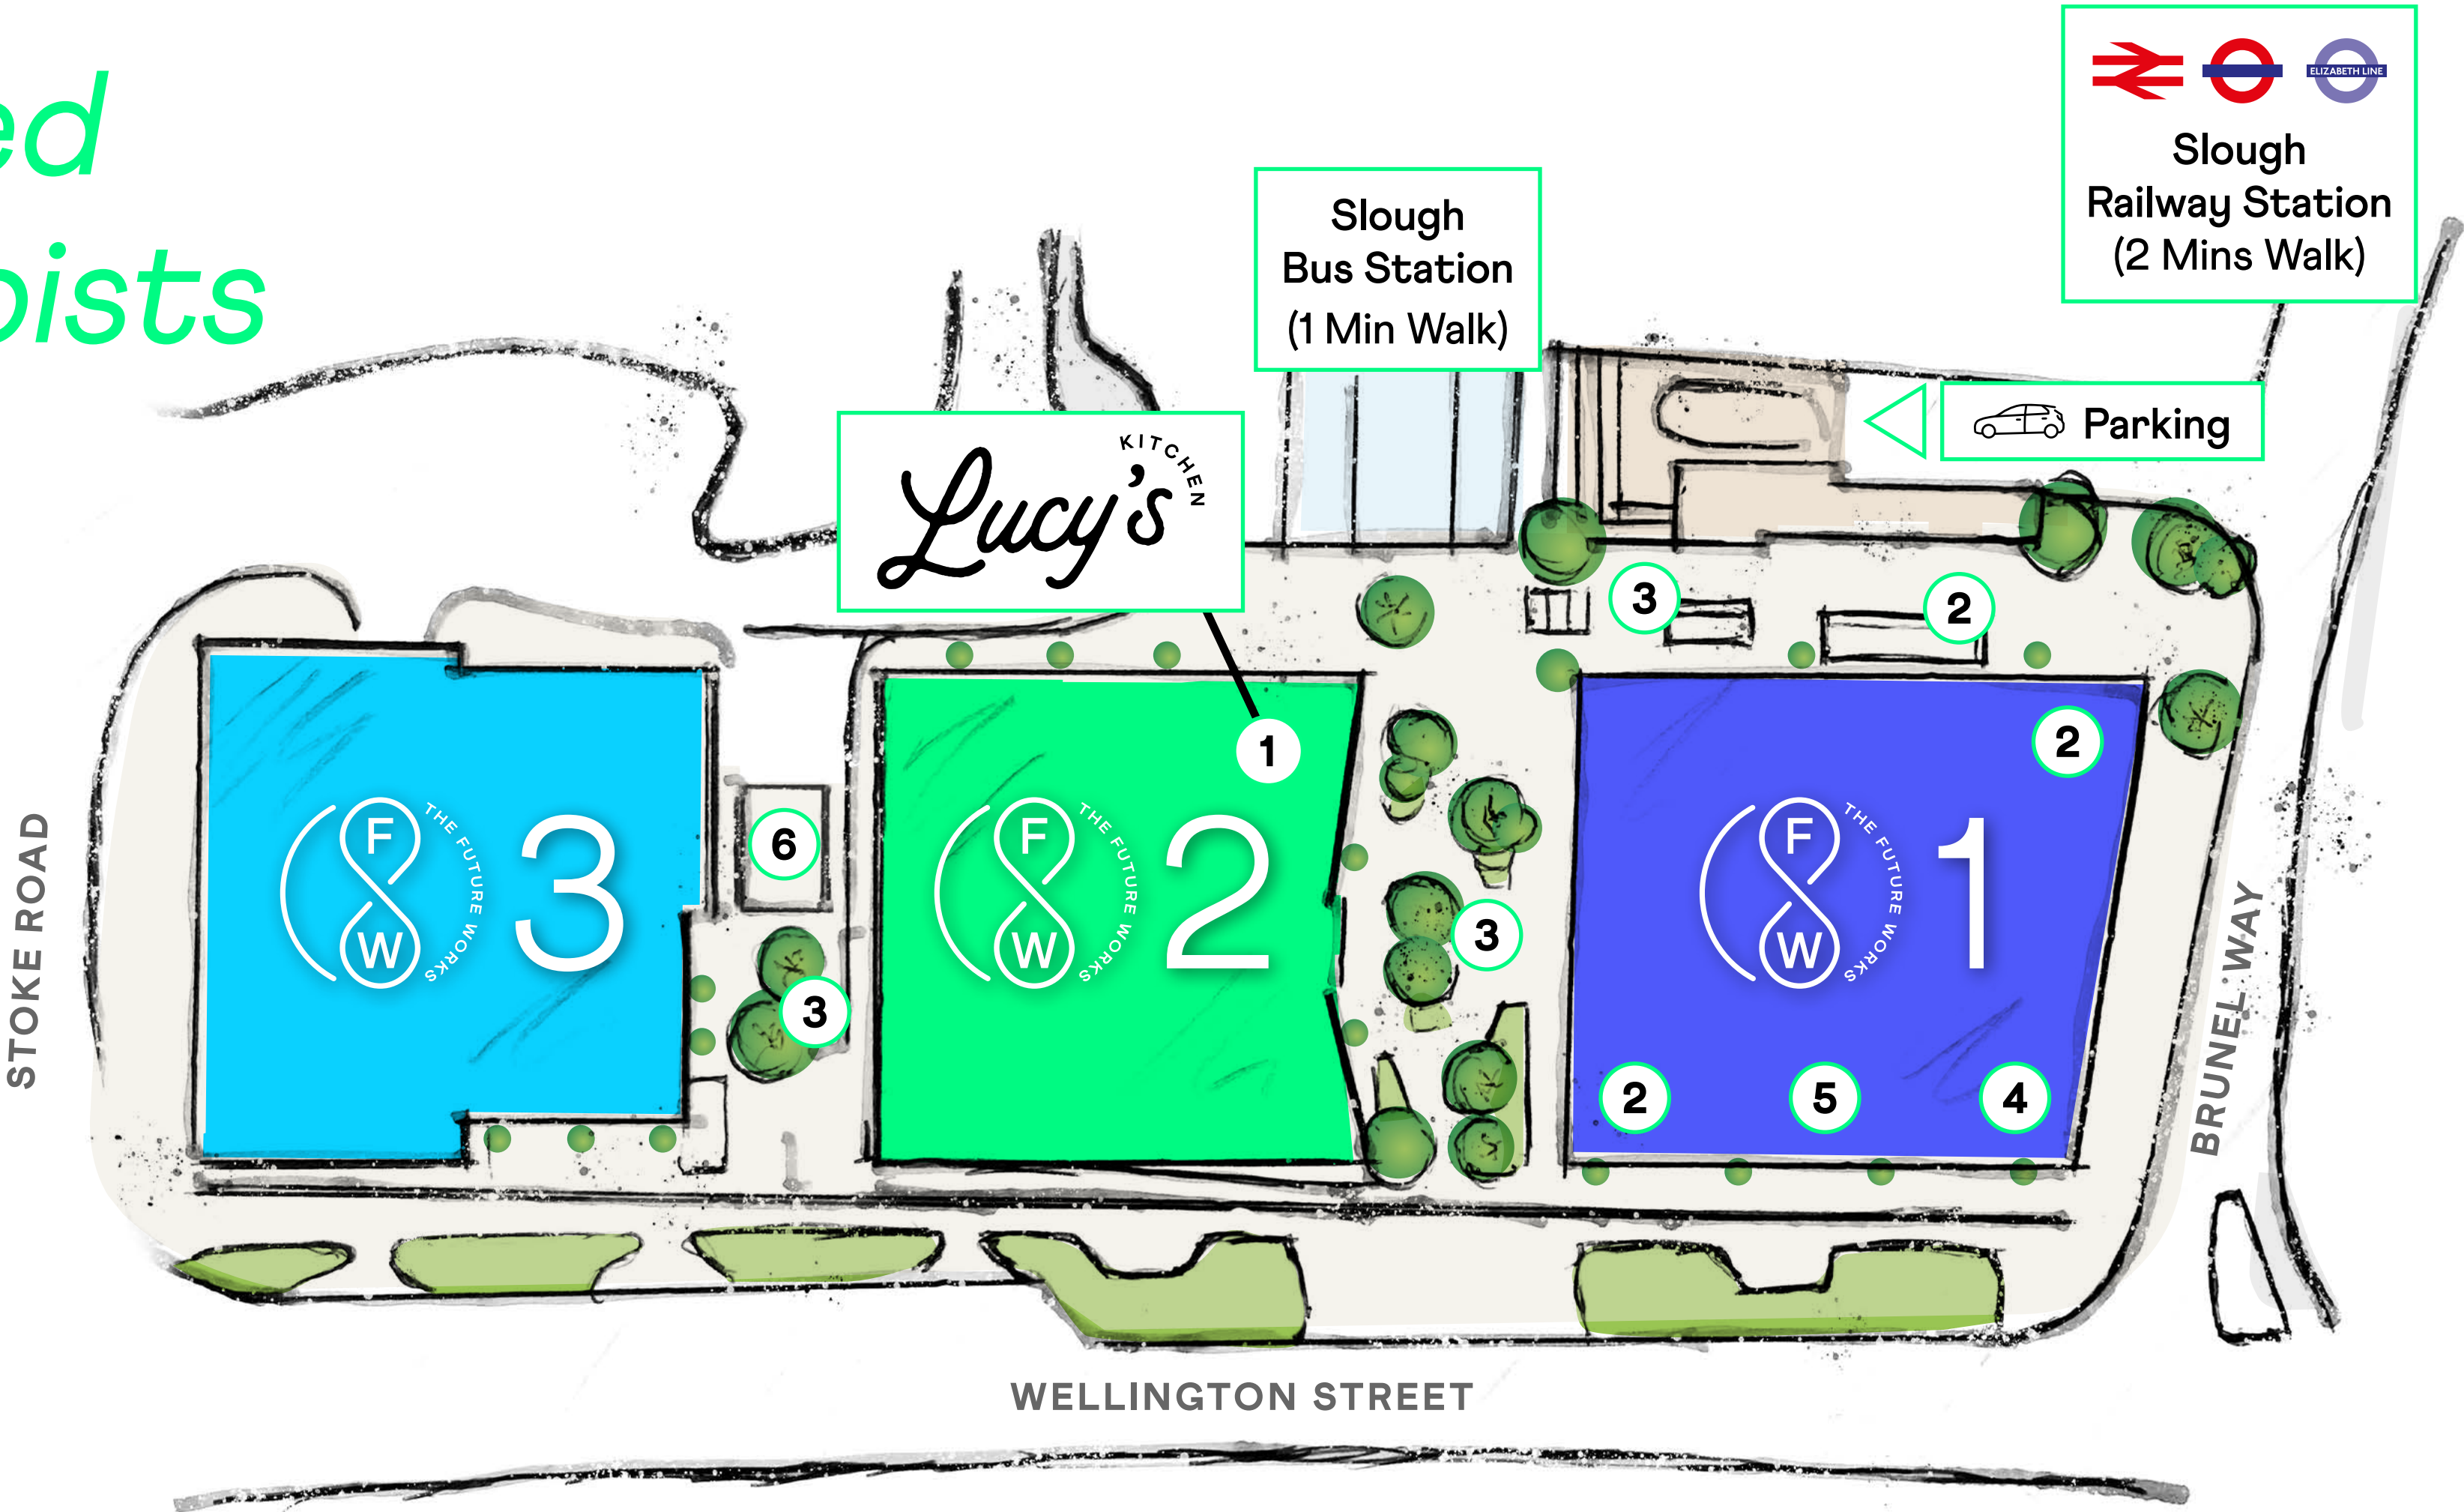

# As recommended by retail therapists

You don't go to work to shop, but it's good to know you're never far from an emergency box of paperclips or bottle of Chanel No.5. The Future Works campus will have its own corner retail spaces. And with plans for a new shopping district, there's endless ways to blow your bonus.

- 1 Lucy's Kitchen (open now)
- 2 Food & Drink
- 3 Landscaped Seating & Gardens
- 4 The Gym & Studio
- 5 Auditorium
- 6 Events Pavillion

# Eat, drink, chill

You are what you eat. So, for gut's sake don't be a mugful of noodles. Seriously, if you're going to work, your mind and body need proper fuel. That's why we're putting tasty, nutritious food on the menu at The Future Works. Meaty, veggie, vegan, super snack, lazy lunch, the best coffee this side of Java and a cheeky beer on the terrace – yes Chef!

# A new spin on flexi-working

We're told we need to get up from our desks more regularly. In fact, the science says we should have screen breaks every hour or so. That's why we've created green terraces and organised yoga classes in the rooftop garden. It's all part of The Future Works philosophy. So, if you go to work to stretch yourself, now's your chance to start taking it literally.

No.1 THE FUTURE WORKS COMMUNAL ROOF TERRACE

# Best seat in the house? Step this way

The Future Works has lots of landscaped outdoor space. And the bleachers between No.1 and No.2 will be perfect for informal meetings or simply chilling out in the sunshine. There's no better way to wind down than a spot of people watching. So, grab a burrito from one of the food trucks, take a grandstand seat and recharge as the hustle bustles on by.

# Relax, you're at work

The best workplaces don't end at the walls and windows. They have their own urban landscapes. Green spaces to relax with a coffee and a good book, or just stretch your legs and free your mind. The Future Works will be a fully joined up campus, with landscaped walkways, meeting spots and pretty piazzas. This isn't just work, it's a breath of fresh air.

# The best things come in threes

No.2 The Future Works was the first building to be completed (told you we do things differently), with No.1 and No.3 coming along soon.

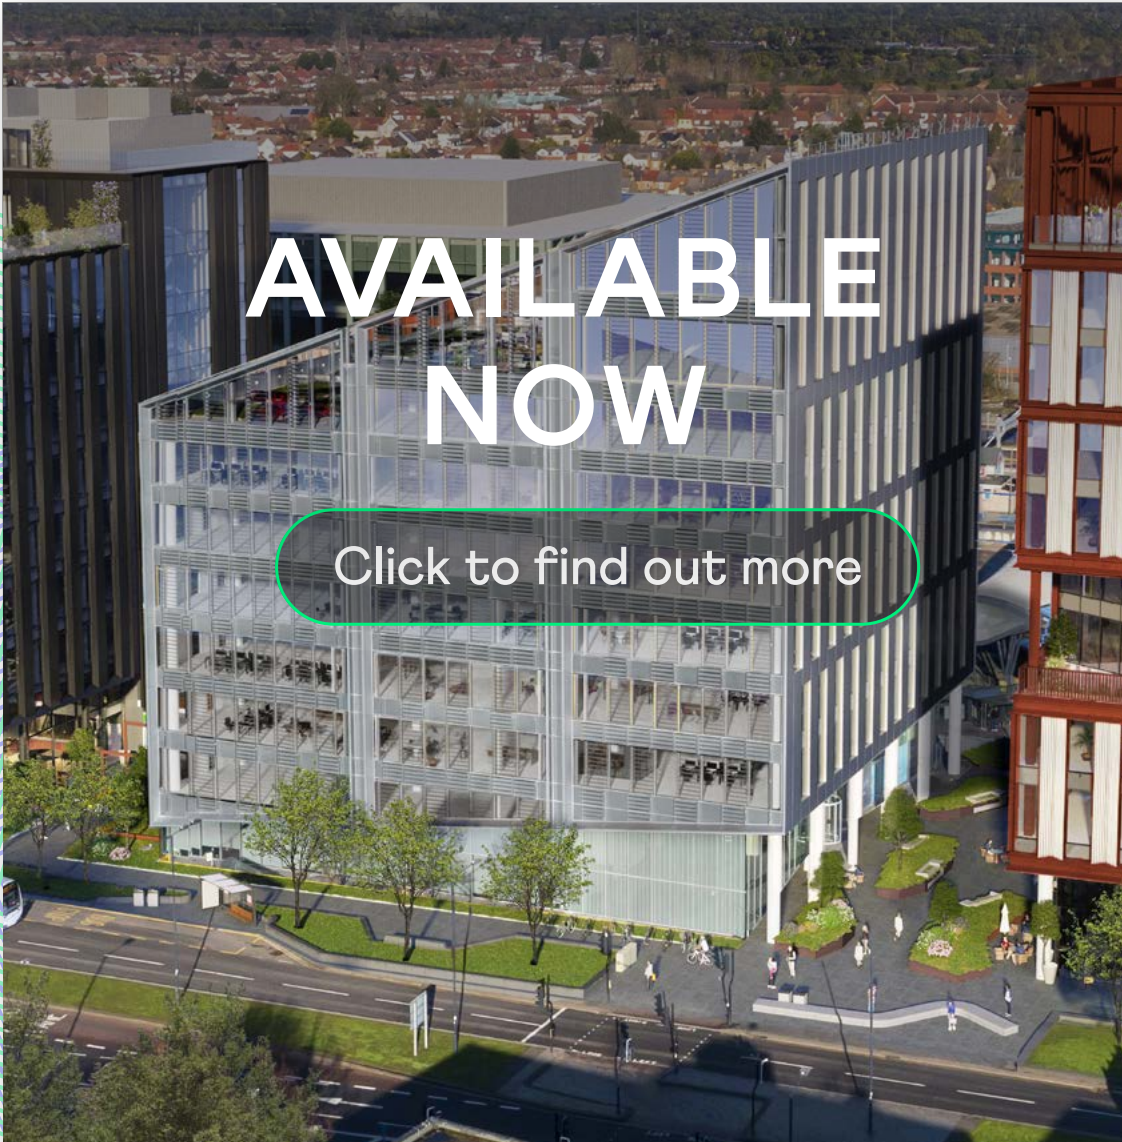

Totalling 360,000 sq ft, this three-building, Grade A office ecosystem will be the place to work, and goes toe-to-toe with anything in London – which, incidentally, is only 14 minutes away by train. We're talking rooftop terraces, restaurants, gyms, landscaping and acres of space – across one superbly inter-connected campus.

Bang in the middle of a new 'Square Mile' regeneration area, The Future Works is at the heart of Slough's commercial quarter. It's everything you'd dare to dream of x3.

Think different, work different.

# Just a step outside London

The Future Works is connected to every corner of the UK. And with Heathrow just 15 minutes away – the world.

By road, cycle path, bus or train; The Future Works couldn't be better connected. Grab your jacket and a two-minute walk later you're at the train station. And if that's not close enough for you, the bus station is literally seconds away.

There's lots of secure basement parking and charging points on site. And with so much bike space, it's an eco-commuters dream come true. Plus, the new Elizabeth Line is coming in 2022, which will zip to Bond Street in 30 minutes flat.

# Slough's got talent

There are big changes coming to Slough: investment, people and business. A massive amount of money is being poured into education, housing, retail and transport. £450m is going into new town centre developments and £3.5bn into regeneration across the borough.

35% who moved here in the last 2 years are under 40. And 20% of those came from London – no surprise, being so well connected and housing at around half the price. With London-quality apartments from the likes of Berkeley Homes, a diverse and vibrant community of young professionals is growing, which is great for local employers.

There are 4,600 businesses located in Slough, employing diverse talent from a significant talent pool in the surrounding areas.

# The team that designed the future

This isn't just a workplace, it's the future of work. And a space like this could never happen without the collaboration of an extraordinary team. Intrepid, creative, determined – not afraid to re-write the rulebook. From the first germ of an idea, it's been an incredible journey; one we're all proud to be a part of.

Here's to the future.

Think different, work different.

# AshbyCapital

AshbyCapital LLP is one of the UK’s most active real estate investors. We work with established and respected partners – creating sustainable, future-proofed buildings that prioritise the health and wellbeing of their occupants.

Founded in 2013, our growing property portfolio comprises £1.8bn of assets in various sectors and locations across the UK.

# SHEPPARD ROBSON

Sheppard Robson is an award-winning practice with a portfolio of major international projects spanning architecture, interior design and masterplanning. Our work has been recognised globally for pushing the boundaries of sustainable design, balancing a drive for efficiency and performance with creativity; this approach adds value to the clients, communities and stakeholders we work with.

The practice designs projects around the world from our offices in London, Manchester and Glasgow. Whether delivering the transformation of an urban block in Central London or creating a series of masterplans for four of Africa's fastest growing cities, our work responds to a project's physical and cultural context, and the aspirations of our clients.

Our expertise spans a broad range of typologies, including Masterplanning, Retail, Residential, Hotels, Arts & Culture, Offices, Interior Design (ID:SR), Schools, Colleges, Universities, Student Living, Science and Healthcare.

# SHEPPARD ROBSON

*“The Future Works is a rare opportunity appealing to the next generation of office occupiers. The brief was to design three buildings with their own identity to an inter-connected campus make up the new campus at the heart of Slough. It will be among the most sustainable and technologically advanced in the Thames Valley, targeting net-zero carbon emissions.*

*Wellness is also a focus, with best-in-class amenities, multiple roof terraces and biophilic design to connect those working in the building to the outside world.”*

**Mark Kowal**
